

ADDENDUM #1 – PAVING SERVICES

Is this project intended to be a submittal equipment for the county on a project that the county is self performing or does the county need a full spread of equipment with operators to complete a specific task?

Example- Does the county just want a rock chipper/spreader, or do they need a whole crew (hand labors through rollers and operators) to do a chip seal road?

- In the past, the County has used the equipment plus crew. If you have both options to offer, just equipment and equipment with a crew, please include those different hourly rates.
